

The Jefferson County Land & Water Conservation Department has several tree planting machines available for rent. These planters are meant for seedling tree stock and do not work well for the evergreen transplant size trees we offer through our tree sale program. Rather, these tree planters are ideal for the seedling tree stock sold through the Wisconsin DNR Tree sale program or other private vendors selling seedling sized trees.

For a link to the WDNR Tree Sale click here: <http://dnr.wi.gov/topic/TreePlanting/>

In order to run the tree planters, you will need a minimum of 40 hp tractor with standard hydraulic couplings.
